GIS Portfolio Webpage: Vu Tran, GISP — Portfolio

Professional Experience

GIS Analyst CO
WSP USA - Denver 07/2023 – present
- Lead developer of the FUN box, Python Open-Source GIS Applications, Python Script Tools (for ArcGIS Pro)
- Lead developer of Machine Learning Models to classify land cover types using satellite imagery
- Lead developer of internal open-source GIS tools to enhance workflows.
- Develop and update ArcGIS Online Web Maps and Web Applications
- Support FEMA Risk MAP Projects
- Coordinate with engineers, project managers and clients to streamline standard operation procedures

Geospatial Analyst CO
Axim Geospatial – Denver 03/2023 – 07/2023
- Analyze and edit hydro, transportation, build-up area, and infrastructure feature classes within an Area of Interest (AOI) by using advanced ArcMap editing tools and satellite imagery.
- Digitize, conditioning, and check attributes for hydro and transportation networks using ArcMap defense mapping tools.

GIS Specialist Intern CO
City of Westminster, Parks, Recreation and Library - Westminster 06/2022 – 03/2023
- Automate the clean-up and data management process of more than 1000 land parcels by creating and running a Python/ArcPy script.
- Digitize over 100,000 feet of city's fence lines. Inventory grass types for Parks. Convert land survey descriptions into polygon (COGO).
- Assist other departments with GIS (walkability analysis, ash tree removal grants application, selecting parcels affected by road works, …)
- Design more than 100 print maps and web-maps of parks and open spaces with ArcMap, ArcGIS Pro and ArcGIS Online.
- Collect and inventory city's property data such as trash cans, fence gates, fence lines, signs, invasive species, …

GIS Lab Assistant CO
University of Colorado Boulder, Geography Department - Boulder 01/2022 – 05/2022
- Answer, explain questions, and assist students in analyzing geospatial data for GIS projects by using ArcMap toolbox and Model Builder.
- Offer technical support to students, helping them troubleshoot and resolve issues with ArcMap's Spatial Analyst's tools and Model Builder.

Snow Hydrology Intern CO
University of Colorado Boulder, Geography Department - Crested Butte 01/2022 – 05/2022
- Use Slope, Aspect and Reclassify tools in ArcMap to analyze raster data and to pick out the most suitable sites for data collection.
- Create a multipoint feature class to collect digging sites (snow pits) coordinates and its associated attribute data (ArcMap).
- Investigate and build a model to predict the amount of water stored in snowpack for 2022 season in Snodgrass Mountain.

Knowledge / Skill

- ESRI ArcGIS (ArcMap 10.8, Model Builder, ArcCatalog, ArcPy, ArcGIS Pro, ArcGIS Online, ArcGIS Portal), QGIS, SQL
- ESRI Web Mapping: ArcGIS Online, ArcGIS Portal, Dashboard, Experience Builder, ArcGIS Arcade
- GIS Programming and scripting languages: Python (ArcPy, and open-source library), JavaScript, HTML, CSS, and C# + .NET
- Field data collection: GNSS (Trimble R1, Bad Elf), ArcGIS Field Map (or Collector), ArcGIS Survey 123.
- Edit and digitize spatial data (vector data): shapefile, geodatabase, SDE layers (versioning), familiar with CAD (AutoCAD)..

Education

University of Colorado - Boulder:
- Bachelor's Degree: Geography (GIS Focus).
- Undergraduate GIS Certificate.
- Relevant courses: GIS Mapping, GIS Spatial Analytics, GIS Spatial Modeling, GIS Programing, Web Mapping and Geo-Visualization, Statistics and Geographic Data, Information Science 2, Computer Science 1, Machine Learning and Spatial Data.

Professional Certification

GIS Certification Institute:
- Geographic Information Systems Professional (GISP)
- Certificate Number: 162382
